The 2018-2019 year will bring many exciting changes for CARMA Members! We are adding new membership benefits and resources, as well as redesigning the way we categorize membership in the hopes of making things clearer and easier to understand for our users. If your institution was previously enrolled in the "Consortium Webcast Program", that will now be referred to as an "Institutional Premium" Membership. If your institution was previously enrolled in the "International Video Library Program", that will now be referred to as an "Institutional Basic" Membership. The table below outlines the details of each membership, and the following pages give overviews and schedules for each event.

**Membership Benefits**

**Online Events:**
- CARMA Webcast Lectures: Live & On-Demand, On-Demand
- Online Methods Panels: Live & On-Demand, On-Demand
- Advanced Reviewer Development Series: Live & On-Demand, On-Demand
- CARMA-RMD New Doctoral Student Orientation: Live & On-Demand, On-Demand

**Other:**
- Video Library Recorded Lectures: full 130+, full 130+
- 12 Global Scholar Recorded Lectures: Yes, Yes
- Research Methods Education Program: All 4 Modules, All 4 Modules
- Short Course Registration Discount: 50% discount, 50% discount
CARMA Webcast Lectures

Overview:
The CARMA Webcast Lecture Series was established in 2004 to provide university faculty, graduate students, and other researchers with advanced training in research methods and data analysis. This annual series consists of ten live webcast lectures presented by nationally recognized methodologists. These lectures are developed at an introductory and advanced doctoral student level and will typically include an introduction to the topic as well as a consideration of current technical issues. Emphasis is placed on the application of the research method technique. For members with access to the series, three access points for group viewing are allowed for each lecture and all faculty and students are eligible to view. Prior to each lecture, background readings, references, and powerpoint slides for the presentation will be available on the CARMA website.

Live Access: Institutional Premium members only.

Schedule (tentative):

Sep 28, 2018  Dr. Jose Cortina, Virginia Commonwealth University, Topic: TBA
Oct 26, 2018  Dr. Andreas Schwab, Iowa State University, Topic: Null Hypothesis Testing & Bayesian Analysis
              Dr. Scott Tondidandel, Davidson College, Topic: TBA
Nov 16, 2018  Dr. Sang Woo, Purdue University, Topic: Big Data Methods for Data Collection
              Dr. Joe Hair, Louisiana State University, Topic: Partial Least Squares Analysis
Jan 25, 2019  Dr. Mike Pratt, Boston College, Topic: Rethinking the Qualitative Methods Section
Feb 22, 2019  Dr. Dan Putka, HumRRO, Topic: Modern Prediction Methods
              Dr. Chris Nye, Michigan State University, Topic: Categorical Variables and Moderation
Apr 12, 2019  Dr. Myles Shaver, University of Minnesota, Topic: Casual Identification and Cumulative Research
              Dr. Craig Enders, U.C.L.A., Topic: Missing Data
CARMA Video Library

Overview:
Archived versions of all Live Webcast Lectures since 2004 are available within the CARMA Video Library. The Video Library currently contains over 130 recorded lectures from internationally recognized scholars on a variety of research methods (including qualitative and quantitative). All faculty and students from member universities will have on-demand individual access to all of these recorded lectures at any time from any location. These lectures and related materials can serve as a resource for authors, reviewers, and editors seeking guidance on basic and advanced research methods design and analysis questions. They also can be used as a teaching resource, adding variety to the in-class experience with group viewing and/or as assigned for individual access outside of class, thus enriching the learning experience. Instructors find our videos valuable as they provide insight into current issues in research methods and give students an opportunity to hear from experts in the field of research methods. The recordings enhance knowledge and application of research methods and by providing a basis of discussion and debate.

Access: Institutional Premium and Institutional Basic members.

Schedule: All recordings are available on demand throughout the membership period.
CARMA-RMD New Doctoral Student Orientation*

Overview:

This event is in collaboration with the Research Methods Division of the Academy of Management (AOM-RMD), who has provided guidance on content. It will consist of four two-hour lectures delivered live online for group viewing by CARMA Member universities. Recordings will subsequently be available for on-demand access by individual student (and faculty) viewing. The goal is to provide an overview of research methods as used in organizational/management areas for incoming doctoral students. Topics to be covered include an overview of quantitative/qualitative research methods, measurement and design, statistical inference, and writing/reviewing. This 8-hour intensive introduction will enable these students to develop a "big-picture" view of the tools and techniques they will be learning in their subsequent coursework. This orientation will also enable them to better understand empirical research as they further develop their methods training in doctoral courses, and better function as research assistants during the early stages of their program.

Live Access: Institutional Premium Members only.

Schedule (tentative):

Thur/Fri Aug 23, 24 (11:00am-1:00pm CT; 2:00-4:00 pm CT)
(a) 2 hour overview of quantitative/qualitative research methods,
(b) 2 hour introduction to measurement and design,
(c) 2 hour overview of hypothesis testing and multivariate techniques,
(d) 2 hour special topics: writing methods and results, reviewing, RMD, ORM

Panelists: TBA

*New benefit of 2018-2019 CARMA Membership
CARMA Global Lecture Series*

Series Overview:

One of CARMA's signature programs since 2004 is its Webcast series, through which U.S. based distinguished research methods scholars now come to Lincoln Nebraska, and deliver a one-hour lecture that is live streamed to universities who are members of CARMA (recordings are also available for on-demand viewing). As a supplement to the Webcast series, the new CARMA Global Scholars Lecture Series is aimed at increasing awareness of the important methodological work being done by researchers from outside the US. This series will feature a set of one-hour lectures on introductory and advanced quantitative and qualitative research topics that are recorded locally (at their home location) by global scholars. This series includes only recorded lectures- no live viewing is provided. These recorded lectures will be released monthly to CARMA Members during their program membership period and will be found within the CARMA Video Library. Powerpoint slides and suggested readings will be available for each recorded lecture.

Access: Institutional Premium and Institutional Basic members.

Schedule (tentative):

Aug  Heiko Breitsohl, University of Klagenfirt, Austria, Topic: SEM and Experimental Designs
Sept Tine Koehler, University of Melbourne, Topic: TBA
Oct  Karsten Jonsen, Topic: Convincing Qualitative Research
Nov  Mike Cheung, The National University of Singapore, Topic: Meta-Analysis and SEM
Dec  Charles Vincent, University of Buckingham, Topic: Conjoint Analysis with Dummy Variable Regression
Jan  Jeremy Dawson, University of Sheffield, Topic: Moderation/Mediation
Feb  Vladimer Kobashyi and Stefan Mol, Topic: Text Classification
Mar  Ramon Wenzel, University of Western Australia, Topic: Big Data

*New benefit of 2018-2019 CARMA Membership
CARMA Advanced Reviewer Development Series*

Series Overview:

The objective of this new series is to serve as a research methods resource for authors of empirical substantive management research, as well as journal reviewers and action editors. It will consist of four Professional Development Workshops (PDWs) delivered live online during the program membership period, and on-demand recordings will also be available for member viewing. Each PDW will address an advanced research methods topic where there is a need for discussion of key issues, an updated set of references, and a set of recommended practices. This series is being developed in collaboration with the journal Organizational Research Methods (ORM), and it is expected that after ORM editorial review a set of articles based on the PDWs will be published as a Virtual Feature Topic.

Live Access: Institutional Premium Members only.
Access to Recordings: Institutional Premium and Institutional Basic Members.

Schedule (tentative):

Oct 5
Nov 30
Feb 1
Mar 1

*New benefit of 2018-2019 CARMA Membership
CARMA Research, Methods, and Better Science Series*

Series Overview:

Our organizational sciences community faces many challenges, and increasingly there is encouragement for fundamental changes in our approach to our research. In terms of the content of our research, these changes include an increased focus on production of "credible knowledge that can be used to inform progressive government policies and promote positive business and management practices" (RRBM Executive Briefing https://www.rrbm.network/link). Regarding the methods of our research, these changes include increased attention to a replication crisis by "sharing structured analyses" and "using best (open) practices to reinforce integrity in our methods" (SIOP Robust and Reliable Research Task Force: http://www.siop.org/rr/default.aspx)

This series consists of four virtual panel sessions focusing on these changes in research and methods, and features top organizational scholars who are leaders of this change within four academic communities (Society for Industrial Organizational Psychology, Responsible Research for Business and Management, Strategic Management Society, Academy of International Business). They will share their views on the reasons behind why these changes are critical for our future success, and their recommendations for specific actions by those in the research ecosystem (e.g., researchers, editors, journals). The panel sessions will be delivered live via a virtual classroom for group viewing, and recordings will subsequently be available for individual viewing.

**Live Access:** Institutional Premium Members only.  
**Access to Recordings:** Institutional Premium and Institutional Basic Members.

**Schedule (tentative):**

Oct 12 Society for Industrial Organizational Psychology (SIOP)  
Panelists: Steven Rogelberg, Fred Oswald, Grand, Ron Landis, George Banks

Jan 18 Responsible Research in Business & Management (RRMB) Network  
Panelists: Anne Tsui, William Glick, Jerry Davis

Feb 15 Strategic Management Society Research Methods Community (SMS-RMC)  
Panelists: Karen Schnatterly, Trevis Certo, Andreas Schwab

Mar 26 Academy of International Business Research Methods Special Interest Group (AIB RM-SIG)  
Panelists: Catherine Welch, Bo Nielsen, Stewart Miller, Agnieszka Chidlow

*New benefit of 2018-2019 CARMA Membership*
Research Methods Education Program

Overview:

The CARMA Research Methods Education Program is based on a series of four modules linked to existing programs and events. The total time requirement to complete the program is designed to be roughly equivalent to typical expectations for a three-course minor in a research university within the United States.

Modules will be comprised of different types of CARMA events, including current and past webcast recordings and short courses. Each component of each module will include a reference list of widely available readings, learning objectives, and an online assessment experience. Upon satisfactory completion of each module requirement, participants will receive a CARMA Digital Badge (electronic certificate). Following the successful completion of all 4 Modules, they will be recognized as a Distinguished CARMA Research Methods Scholar on the CARMA website. All participating students and faculty must have a RMEP Sponsor from their university. The Sponsor must confirm the participant is an enrolled student or faculty in good standing at their university, and must meet with the participant at the beginning of their RMEP training to assure understanding of CARMA’s Assessment Code of Ethics. CARMA will NOT provide academic credit from the University of Nebraska, but faculty and administrators of graduate programs may decide to provide academic credit at their university once CARMA certifies successful completion of program requirements. It is up to the student’s university to decide if academic credit is warranted, and if so how much, based on their university’s requirement.

More information regarding what each module contains can be found on our website.

Access: Institutional Premium and Basic Members.

Schedule: There is no time limit for completing the program, although there is a 1-year recommended track and a calendar outline for this track.
