

**College of Business**  
**Summer Research Support Policy**  
**Effective June 2018**

Summer research support will be provided to tenured and tenure-track faculty who publish in journals on the CoB Summer Research Support List and are intended to provide faculty release from summer teaching duties and the time to remain research active. The College support will equal \$25,000 per summer for a total of three summers. The summer support will be provided for publications with DOIs and/or with publication dates in the prior calendar year, based on whichever date comes first. The provided support is subject to the following conditions:

1. Faculty who have summer funding commitments by contract (e.g., newly hired assistant professors) are not eligible to receive this support during years that contract commitments are paid.
2. Full professors with administrative summer stipends will receive \$25,000 in place of their administrative stipends for publications on the journal list.
3. Faculty with less than full rank will receive \$25,000 in addition to their administrative stipend.
4. Continuance of this policy is contingent upon available funding and/or policy changes.
5. Faculty who accept a summer research support payment are expected to remain an employee of the university for at least one additional year.
