2018-2019 CARMA Membership Information

The 2018-2019 year will bring many exciting changes for CARMA Members! We are adding new membership benefits and resources, as well as redesigning the way we categorize membership in the hopes of making things clearer and easier to understand for our users. If your institution was previously enrolled in the "Consortium Webcast Program", that will now be referred to as an "Institutional Premium" Membership. If your institution was previously enrolled in the "International Video Library Program", that will now be referred to as an "Institutional Basic" Membership. The table below outlines the details of each membership, and the following pages give overviews and schedules for each event.

Membership Benefits (Individual & Panel Presentations):
- Webcast Lecture Series (10 new, 150 On-Demand)
- Global Scholar Series* (12)
- Research, Methods, and Better Science Series* (4)
- Advanced Reviewer Development Series* (4)
- CARMA-RMD New Doctoral Student Series*

Membership Benefits (Education Resources):
- Research Methods Education Program
- Short Course Registration Discount

CARMA Webcast Lectures

Overview:
The CARMA Webcast Lecture Series was established in 2004 to provide university faculty, graduate students, and other researchers with advanced training in research methods and data analysis. This annual series consists of ten live webcast lectures presented by nationally recognized methodologists. These lectures are developed at an introductory and advanced doctoral student level and will typically include an introduction to the topic as well as a consideration of current technical issues. Emphasis is placed on the application of the research method technique. For members with access to the series, three access points for group viewing are allowed for each lecture and all faculty and students are eligible to view. Prior to each lecture, background readings, references, and powerpoint slides for the presentation will be available on the CARMA website.

Live Access: Institutional Premium members only.

Schedule:

Sept 28, 2018 12 PM ET  Dr. Jose Cortina, Virginia Commonwealth University
  Topic: Restricted Variance Interactions

Oct 26, 2018 12 PM ET  Dr. Andreas Schwab, Iowa State University
  Topic: Null Hypothesis Testing & Bayesian Analysis

  1:15 PM ET  Dr. Joe Hair, University of Alabama
  Topic: Partial Least Squares Analysis

Nov 16, 2018 12 PM ET  Dr. Scott Tonidandel
  Topic: Mining Text Data

Jan 25, 2019 12 PM ET  Dr. Sang Woo, Purdue University
  Topic: Big Data Methods for Data Collection

  1:15 PM ET  Dr. Mike Pratt, Boston College
  Topic: Rethinking the Qualitative Methods Section

Feb 22, 2019 12 PM ET  Dr. Dan Putka, The Human Resources Research Organization
  Topic: Modern Prediction Methods

  1:15 PM ET  Dr. Chris Nye, Michigan State University
  Topic: Categorical Variables and Moderation

Apr 12, 2019 12 PM ET  Dr. Myles Shaver, University of Minnesota
  Topic: Missing Data Techniques

  1:15 PM ET  Dr. Craig Enders, University of California, Los Angeles
CARMA Video Library

Overview:
Archived versions of all Live Webcast Lectures since 2004 are available within the CARMA Video Library. The Video Library currently contains over 130 recorded lectures from internationally recognized scholars on a variety of research methods (including qualitative and quantitative). All faculty and students from member universities will have on-demand individual access to all of these recorded lectures at any time from any location. These lectures and related materials can serve as a resource for authors, reviewers, and editors seeking guidance on basic and advanced research methods design and analysis questions. They also can be used as a teaching resource, adding variety to the in-class experience with group viewing and/or as assigned for individual access outside of class, thus enriching the learning experience. Instructors find our videos valuable as they provide insight into current issues in research methods and give students an opportunity to hear from experts in the field of research methods. The recordings enhance knowledge and application of research methods and by providing a basis of discussion and debate.

Access: Institutional Premium and Institutional Basic members.

Schedule: All recordings are available on demand throughout the membership period.
CARMA-RMD New Doctoral Student Orientation*

Overview:

This event is in collaboration with the Research Methods Division of the Academy of Management (AOM-RMD), who has provided guidance on content. It will consist of four two-hour lectures delivered live online for group viewing by CARMA Member universities. Recordings will subsequently be available for on-demand access by individual student (and faculty) viewing. The goal is to provide an overview of research methods as used in organizational/management areas for incoming doctoral students. Topics to be covered include an overview of quantitative/qualitative research methods, measurement and design, statistical inference, and writing/reviewing. This 8-hour intensive introduction will enable these students to develop a "big-picture" view of the tools and techniques they will be learning in their subsequent coursework. This orientation will also enable them to better understand empirical research as they further develop their methods training in doctoral courses, and better function as research assistants during the early stages of their program.

Live Access: Institutional Premium Members only.

Schedule:

Aug 23, 2018
10-12 PM ET: Dr. Larry Williams, University of Nebraska-Lincoln
Topic: Overview of the Research Process
2-4 PM ET: Dr. Lisa Lambert, Oklahoma State University & Rhonda Reger, University of Missouri
Topic: Design and Measurement with Quantitative and Qualitative Data

Aug 24, 2018
10-12 PM ET: Dr. Fred Oswald, Rice University & Dr. Lee (Betty) Zhou, University of Minnesota
Topic: Overview of Hypothesis Testing and Statistical Methods
2-4 PM ET: Dr. George Banks, University of North Carolina Charlotte, John Kammeyer-Mueller, University of Minnesota, & Paul Bliese, University of South Carolina
Topic: Resources for Writing and Reviewing

*New benefit of 2018-2019 CARMA Membership
CARMA Global Lecture Series*

Series Overview:

One of CARMA’s signature programs since 2004 is its Webcast series, through which U.S. based distinguished research methods scholars now come to Lincoln Nebraska, and deliver a one-hour lecture that is live streamed to universities who are members of CARMA (recordings are also available for on-demand viewing). As a supplement to the Webcast series, the new CARMA Global Scholars Lecture Series is aimed at increasing awareness of the important methodological work being done by researchers from outside the US. This series will feature a set of one-hour lectures on introductory and advanced quantitative and qualitative research topics that are recorded locally (at their home location) by global scholars. This series includes only recorded lectures- no live viewing is provided. These recorded lectures will be released monthly to CARMA Members during their program membership period and will be found within the CARMA Video Library. Powerpoint slides and suggested readings will be available for each recorded lecture.

Access: Institutional Premium and Institutional Basic members.

Schedule:

Oct 1  Jeremy Dawson, University of Sheffield, Topic: Moderation/Mediation
Nov 5  Tine Koehler, University of Melbourne, Topic: Constructive Replication
Dec 3  Mike Cheung, The National University of Singapore, Topic: Meta Analysis & SEM
Jan 7  Heiko Breitsohl, University of Klegenfirt, Topic: SEM and Experimental Designs
Feb 4  Mikko Ronnko, University of Jyvasklya, Topic: Partial Least Squares
Mar 4  Ramon Wenzel, University of Western Australia, Topic: Big Data
Apr 1  Charles Vincent, University of Buckingham, Topic: Conjoint Analysis with Dummy Variable Regression
May 6  Amedeo Pugliese, University of Padova, Topic: TBA
June 3  Vladimir Kobashvi, University of the Philippines & Stefan Mol, University of Amsterdam, Topic: Text Classification
July 1  Theresa Schmiedel, University of Liechtenstein, Topic: Topic Modeling as a Strategy of Inquiry
Aug 5  April Wright, University of Queensland, Topic: Participant Deconstruction with Field Research

*New benefit of 2018-2019 CARMA Membership
CARMA Advanced Reviewer Development Series*

Series Overview:

The objective of this new series is to serve as a research methods resource for authors of empirical substantive management research, as well as journal reviewers and action editors. It will consist of four Professional Development Workshops (PDWs) delivered live online during the program membership period, and on-demand recordings will also be available for member viewing. Each PDW will address an advanced research methods topic where there is a need for discussion of key issues, an updated set of references, and a set of recommended practices. This series is being developed in collaboration with the journal Organizational Research Methods (ORM), and it is expected that after ORM editorial review a set of articles based on the PDWs will be published as a Virtual Feature Topic.

Live Access: Institutional Premium Members only.
Access to Recordings: Institutional Premium and Institutional Basic Members.

Schedule:

Sept 21, 2018  Panelists: Herman Aguinis, George Washington University, Sharon Hill, George Washington University
               12:00pm ET  Topic: Getting and Cleaning Data
               -1:30pm ET

Nov 2, 2018    Panelists: Dan Newman, University of Illinois, Brian Boyd, City University of Hong Kong, &
               12:00pm ET  Lisa Lambert, Oklahoma State University
               -1:30pm ET  Topic: Developing Measures

Feb 1, 2019    Panelists: Ernest O’Boyle, Indiana University, Justin DeSimone, University of Alabama, &
               12:00pm ET  Michel Brannick, University of South Florida
               -1:30pm ET  Topic: Systematic Reviews/Meta-Analysis

Mar 1, 2019    TBA
               12:00pm ET
               -1:30pm ET

*New benefit of 2018-2019 CARMA Membership
CARMA Research, Methods, and Better Science Series*

Series Overview:

Our organizational sciences community faces many challenges, and increasingly there is encouragement for fundamental changes in our approach to our research. In terms of the content of our research, these changes include an increased focus on production of "credible knowledge that can be used to inform progressive government policies and promote positive business and management practices" (RRBM Executive Briefing https://www.rrbm.network/link). Regarding the methods of our research, these changes include increased attention to a replication crisis by "sharing structured analyses" and "using best (open) practices to reinforce integrity in our methods" (SIOP Robust and Reliable Research Task Force: http://www.siop.org/rr/default.aspx)

This series consists of four virtual panel sessions focusing on these changes in research and methods, and features top organizational scholars who are leaders of this change within four academic communities (Society for Industrial Organizational Psychology, Responsible Research for Business and Management, Strategic Management Society, Academy of International Business). They will share their views on the reasons behind why these changes are critical for our future success, and their recommendations for specific actions by those in the research ecosystem (e.g., researchers, editors, journals). The panel sessions will be delivered live via a virtual classroom for group viewing, and recordings will subsequently be available for individual viewing.

Live Access: Institutional Premium Members only.
Access to Recordings: Institutional Premium and Institutional Basic Members.

Schedule (tentative):

- **Oct 12**
  - 12:00pm ET - 1:30pm ET
  - Society for Industrial Organizational Psychology (SIOP)
  - Panelists: Steven Rogelberg, Fred Oswald, Ron Landis, George Banks

- **Jan 18**
  - 12:00pm ET - 1:30pm ET
  - Responsible Research in Business & Management (RRMB) Network
  - Panelists: Anne Tsui, William Glick, Jerry Davis

- **Feb 15**
  - 12:00pm ET - 1:30pm ET
  - Strategic Management Society Research Methods Community (SMS-RMC)
  - Panelists: TBA

- **Mar 26**
  - 12:00pm ET - 1:30pm ET
  - Academy of International Business Research Methods Special Interest Group (AIB RM-SIG)
  - Panelists: Catherine Welch, Bo Nielsen, Stewart Miller, Agnieszka Chidlow

*New benefit of 2018-2019 CARMA Membership*
Research Methods Education Program

Overview:

The CARMA Research Methods Education Program is based on a series of four modules linked to existing programs and events. The total time requirement to complete the program is designed to be roughly equivalent to typical expectations for a three-course minor in a research university within the United States.

Modules will be comprised of different types of CARMA events, including current and past webcast recordings and short courses. Each component of each module will include a reference list of widely available readings, learning objectives, and an on-line assessment experience. Upon satisfactory completion of each module requirement, participants will receive a CARMA Digital Badge (electronic certificate). Following the successful completion of all 4 Modules, they will be recognized as a Distinguished CARMA Research Methods Scholar on the CARMA website. All participating students and faculty must have a RMEP Sponsor from their university. The Sponsor must confirm the participant is an enrolled student or faculty in good standing at their university, and must meet with the participant at the beginning of their RMEP training to assure understanding of CARMA’s Assessment Code of Ethics. CARMA will NOT provide academic credit from the University of Nebraska, but faculty and administrators of graduate programs may decide to provide academic credit at their university once CARMA certifies successful completion of program requirements. It is up to the student’s university to decide if academic credit is warranted, and if so how much, based on their university's requirement.

More information regarding what each module contains can be found on our website.

Access: Institutional Premium and Basic Members.

Schedule: There is no time limit for completing the program, although there is a 1-year recommended track and a calendar outline for this track.
