The Central Plains Research Data Center (CPRDC) is a special research facility at the University of Nebraska-Lincoln that is operated in partnership with the U.S. Census Bureau to provide researchers with approved projects access to restricted-use federal data. Data are available from a number of federal agencies, including the Census Bureau, the National Center for Health Statistics, the Internal Revenue Service, the Bureau of Labor Statistics, and other agencies. Restricted access data sets are typically more detailed and provide finer geographic coverage than public use data sets. A Census administrator is on site to assist researchers in the development of proposals, to facilitate security clearances, and to assist in implementation of approved research projects. The purpose of the CPRDC is to enhance academic research, research infrastructure, and the recruitment of research oriented faculty and graduate students. The CPRDC is supported by a consortium of university entities including the University of Nebraska-Lincoln, the University of Nebraska Medical Center, Iowa State University, the University of Iowa, and the University of South Dakota.
