

Business in Nebraska

Volume 53, No. 623

presented by Bureau of Business Research (BBR)

September 1997

Nebraska's Economy Keeps on Humming

Charles Lamphear

Second quarter (April-June) 1997 business conditions survey results indicate that the state's economy continues to expand at a healthy pace with no evidence of a slowdown. Substantial numbers of the reporting businesses continue to indicate gains in operating revenues. Only 21 percent reported a decrease in 2nd quarter earnings over 1st quarter earnings. Only 25 percent reported a decrease in 2nd quarter 1997 earnings over 2nd quarter 1996 earnings.

Creation of new jobs across the state continues to grow at a nearly constant rate. At the state level, the survey shows that new job growth is averaging about 20,000 full-time jobs each quarter. Generally, the state's metro and nonmetro counties are sharing about equally in new job growth.

Many workers are taking home bigger pay checks, especially those who are finding new full-time jobs. The hourly wage differential between replacement hires for existing full-time jobs and new full-time jobs continues to average around \$3.00 per hour. The differential is higher in the state's metro counties.

The number (and rate) of unfilled positions continues to be a significant factor affecting the state's overall economic growth. During 2nd quarter 1997, slightly over 1,200 positions were unfilled, equaling about 1.6 percent of the survey employment base for the quarter. At the state level, the 1.6 percent rate represents an estimated 11,000 full-time jobs that remained unfilled at the end of 2nd quarter.

¹Based on survey responses through September 5, 1997.

The 2nd quarter business conditions survey represents nearly 1,200 participating businesses and organizations across the state with a combined employment base of approximately 79,000 workers. Businesses and organizations excluded from the quarterly survey include agriculture producers, local, state, and federal government units, and nonprofit organizations. The survey covers the nonfarm, private sector of the state's overall economy. The employment base for the nonfarm, private sector for the 2nd quarter of this year was about 699,000 workers. The 2nd quarter survey represents about 11 percent of that employment base.

Operating Revenues

Seventy-nine percent of respondents reported 2nd quarter revenues equal to or higher than 1st quarter 1997 revenues (Table 1). In addition, 75 percent reported 2nd quarter 1997 revenues equal to or higher than 2nd quarter 1996 revenues (Table 1). This survey of Nebraska business conditions shows that 89 percent of reporting businesses expect 3rd quarter revenues to exceed, or at least equal, revenue levels realized during 3rd quarter 1996 (Figure 1).

At the industry level, 57 percent of manufacturers responding to the survey indicated revenue gains during 2nd quarter 1997 compared to 2nd quarter 1996 (Table 1). In addition, 49 percent expect 3rd quarter 1997 revenues to exceed 3rd quarter 1996 revenues (Figure 1). For the FIRE group (finance, insurance, and real estate) 54 percent of reporting businesses indicated higher 2nd quarter 1997 revenues than 2nd quarter 1996 revenues. Additionally, 59 percent expect 3rd quarter 1997 revenues to exceed 3rd quarter 1996 revenues. Forty-four percent of the 300 retailers responding to the survey indicated higher 2nd quarter 1997 revenues compared to 2nd quarter 1996 revenues. Only 12 percent (36) of the retailers in the survey expect 3rd quarter 1997 revenues to fall below 3rd quarter 1996 revenues. Revenue reports for other industry groups are given in Table 1 and Figure 1.

Job Creation and Replacement Hires

Survey respondents reported the creation of slightly over 2,200 new full-time jobs during the 2nd quarter 1997, or about 29 new full-time jobs per 1,000 employees (Tables 2 and 3). The full-time, new job growth rate in the state's nonmetro counties was 30 new jobs per 1,000 employees. The rate for the metro counties was 28 new jobs per 1,000 employees.

	Full-time	Part-time	Full-time	Part-time	Full-time	Part-time
Replacement hires	3,668	2,279	2,293	1,465	1,374	814
New job hires	2,254	939	1,246	573	1,008	366
Total	5,922	3,218	3,539	2,038	2,382	1,180

¹Metro includes Cass, Douglas, Lancaster, Sarpy, and Washington Counties.

Note: Sum of Metro and Nonmetro may not add to State total because some businesses' activities are not restricted to a single county or region.

The rates for the two metro county areas, Omaha MSA and Lincoln MSA, were 25 and 34 per 1,000 employees, respectively. Of the state's nonmetro county areas—Northeast, Southeast, Central, Mid-Plains, and Panhandle regions—the Northeast and Central regions reported the highest rate at 34 new full-time jobs per 1,000 employees.

Table 4 gives average rates of new and replacement full-time hires per 1,000 employees for the combined 1st and 2nd quarters, 1997. The Northeast region led with 47 new full-time hires per 1,000 employees. The Omaha MSA was a distant second with 31 new full-time hires per 1,000 employees.

Survey respondents reported a total of 3,668 full-time replacement hires during 2nd quarter 1997 (Table 2). Slightly over 62 percent of the total replacement hires occurred in the metro counties. The Omaha MSA replacement hire rate was 51 per 1,000 employees (Table 3). The average rate for the Omaha MSA for the combined 1st and 2nd quarters was 51 replacement hires per 1,000 employees (Table 4). The average for the central region was also 51 replacement hires per 1,000 employees.

Nearly 6,000 total new and replacement full-time hires were reported during 2nd quarter 1997 (Table 2). About 4 out of every 10 full-time hires (38 percent) represented new hires. The rate for the state's nonmetro counties was 42 percent.

Assuming that the 2nd quarter survey is representative of the state's total nonfarm private sector employment, an estimated 20,000 new full-time jobs were created during 2nd quarter 1997. Moreover, an estimated 52,600 full-time hires occurred during 2nd quarter that include both new and replacement hires.

Substantial new job growth occurred in all nine occupational groups (Table 5). Nearly 35 percent of all hires for new jobs occurred in the professional groups (executives/administrators, managers/professional specialists, and marketing/sales representatives). This is comparable to 1st quarter 1997 and 4th quarter 1996 survey findings of 32 percent and 29 percent, respectively. In the state's nonmetro counties, about 20 percent of new full-time hires occurred in the professional group. The rate for the metro counties was nearly 47 percent.

Note: Sum of Metro and Nonmetro may not add to State total because some businesses' activities are not restricted to a single county or region.

Wages

Survey results of wages for 2nd quarter 1997 are reported in Tables 6 through 8. Table 6 shows average hourly wages without regard to occupation. Tables 7 and 8 show average hourly wages by occupation. Results of this survey plus the results from previous surveys show a consistent, substantial wage differential between full-time new hires and full-time replacement hires. At the state level, the average hourly wage differential for full-time hires is \$2.83 (Table 6). For nonmetro

and metro counties, the average hourly wage differentials are \$1.63 and \$3.97, respectively. One reason for these differentials is regional differences in the occupation mix of both job turnover and new job growth. New job hires represent a higher percent of professional occupations than the comparable percent for replacement hires. Also, total job hires in nonmetro counties represent a greater proportion of production and service occupations than the comparable proportion for metro

Table 6

¹Metro includes Cass, Douglas, Lancaster, Sarpy, and Washington Counties.

counties. As reported in the June 1997 issue of *Business in Nebraska*, the possibility exists of a new trend in higher-wage job growth in Nebraska. If this is an emerging new trend, and there is evidence to support this notion, it should be welcome news for job seekers who want to make Nebraska their home.

Tables 7 and 8 compare wages by occupation for new and replacement full-time hires. The average hourly wage for

replacement hires at the state level exceeded the average hourly wage for new hires in three occupational categories—executive/administrators, managers/professional specialists, and transportation/material movers. The average hourly wage for replacement hires for the nonmetro counties exceeded the average hourly wage for new hires in one occupational category—transportation/material movers.

¹Metro includes Cass, Douglas, Lancaster, Sarpy, and Washington Counties.

Unfilled Positions

Respondents reported that 1,232 open full-time positions went unfilled during 2nd quarter 1997 (Table 9). Of that total, 645 (52 percent) were not filled due to a lack of qualified applicants. A proportionately higher number of unfilled jobs occurred in the state's nonmetro counties (61 percent). The comparable rate for the state's metro counties was 49 percent. As reported in previous issues of *Business in Nebraska*, data on unqualified applicants should be interpreted with caution. Applicants may be unqualified for a variety of reasons, including lack of necessary job skills, previous work habits, or employer expectations. Further, it takes time to find suitable matches of jobs and skilled workers at virtually all occupational levels. Unfilled positions are an indication of how intense the search is for new employees.

Detailed regional reports for the five nonmetro regions and two metro regions for the 2nd quarter survey are available on the following internet sites:

www.bbr.unl.edu
www.ded.state.ne.us
www.dol.state.ne.us

NQBCS is a joint project of the Nebraska Departments of Economic Development and Labor, and BBR. The following individuals contributed to the completion of this report: Phil Baker, Jolee Wheatley, Jane Sutherland, and Clarence Waldman, Nebraska Department of Labor; Tom Doering and Stu Miller, Nebraska Department of Economic Development; and David Bennett, Annette Miller, and Charles Lamphear, BBR.

Region Composition

Omaha MSA: Cass, Douglas, Sarpy, and Washington Counties.

Lincoln MSA: Lancaster County

Northeast: Antelope, Boone, Boyd, Brown, Burt, Cedar, Colfax, Cuming, Dakota, Dixon, Dodge, Holt, Keya Paha, Knox, Madison, Pierce, Platte, Rock, Stanton, Thurston, and Wayne Counties.

Southeast: Butler, Fillmore, Gage, Jefferson, Johnson, Nemaha, Otoe, Pawnee, Polk, Richardson, Saline, Saunders, Seward, Thayer, and York Counties.

Central: Adams, Blaine, Buffalo, Clay, Custer, Franklin, Garfield, Greeley, Hall, Hamilton, Harlan, Howard, Kearney, Loup, Merrick, Nance, Nuckolls, Phelps, Sherman, Valley, Webster, and Wheeler Counties.

Mid-Plains: Arthur, Chase, Cherry, Dawson, Dundy, Frontier, Furnas, Gosper, Grant, Hayes, Hitchcock, Hooker, Keith, Lincoln, Logan, McPherson, Perkins, Red Willow, and Thomas Counties.

Panhandle: Banner, Box Butte, Cheyenne, Dawes, Deuel, Garden, Kimball, Morrill, Scotts Bluff, Sheridan, and Sioux Counties.

Table 9

Note: Sum of Metro and Nonmetro may not add to State total because some businesses' activities are not restricted to a single county or region.

The Potential Impact of Population Change on School Districts in Nebraska

Lisa Darlington

Projections of the school-age population (age 5 to 17) were presented in the last issue of *Business in Nebraska*. The analysis showed that the school-age population statewide will decrease from 1995 to 2010. Only 18 of the state's 93 counties will experience increases in the number of school age children.

What are the potential impacts of these population losses on school districts across the state? One way to examine the impact is to focus on the number of school districts. Table 1 (see pages 8-9) presents the following for each of the state's 93 counties:

- Column A—Projected rate of change in school age population from 1995 to 2010.
- Column B—Total number of students enrolled in all (public and nonpublic) elementary and secondary schools in Fall 1996¹.
- Column C—Projected number of students enrolled in elementary and secondary schools in Fall 2010 based on the projected rate of change in column A.
- Column D—The difference in numbers of students enrolled, 1996 versus 2010.
- Column E—Total number of school districts in 1996.
- Column F—Average enrollment per district in 1996.
- Column G—Projected average enrollment per district in 2010, assuming that the number of districts does not change.

¹Source: Nebraska Department of Education

Column H—The change in the number of school districts that would be required to maintain 1996 average enrollment per district in 2010.

Columns I & J—The range of enrollment across districts, 1996.

A negative number in Column H indicates that in order to maintain current average student enrollment per district in 2010, the number of districts in a county would have to decrease. A positive number indicates that the average would be maintained with an increase in the number of districts.

In 49 counties the number of school districts would have to decrease by at least one in order to maintain current average enrollment in 2010. Holt County would require a reduction of seven districts; Boone County would lose four districts. Conversely, Dawson County would require an increase of six districts to maintain average enrollment at current levels; Lancaster County would require the addition of three districts. Summing the values in Column H yields a net loss of 59 districts statewide.

Changes would vary widely across regions of the state (Figure 1). The Northeast region would have to lose 26 districts to maintain current average enrollments. The East Central and Panhandle regions each would lose 11 districts. Only the two metro regions would gain districts in this analysis.

Figure 1
Change in Number of School Districts Needed to Maintain 1996 Average Enrollment in 2010, by Region

*Regional values will not add to state total due to rounding.

A New Look, New Capabilities for NU ONRAMP

As 1998 approaches, watch NU *ONRAMP* grow to better serve users' needs. BBR continually strives to improve its service to the public. The new NU *ONRAMP* will be dynamic! Along with the new look comes a powerful, sophisticated system containing added data sets.

Features of the new *ONRAMP* system will allow users to search subjects and areas, view tables, run queries over multiple areas and subjects with the ease of step-by-step wizards, and save personal queries for reuse.

Let BBR meet *your* data needs today and in the future. Those unfamiliar with NU *ONRAMP* are encouraged to take time to browse the system's vast array of data sets.

BBR extends an invitation to set up on-site NU *ONRAMP* training for the convenience of *your* organization. Call the Bureau of Business Research (BBR) today at 402/472-2334 to take advantage of this free training offer.
